SKILLS

I have been learning web development for over a year now. In this time I have become very familiar with HTML, CSS and Javascript. I have also developed skills working with Git and Github. Beyond the basics of web development, I have become proficient in React and the MERN stack through my courses at MIT x PRO and Scrimba. I am always open to learning new technologies and languages as I continue my journey as a web developer.

As an employee, you'll find that I have good attention to detail, and that I can work well with others. I'm a hard worker who is enthusiastic to take the next step in my career.

EXPERIENCE

Snapology - *STEAM Instructor*

MAY 2022- PRESENT

I lead after school programs and camps where kids learn about new technologies such as coding and robotics. We also work on our social skills, teamwork, and creativity as we tackle a huge variety of lego-builds and other hands-on projects.

Rasco Middle School - *Special Education Instructor*

AUGUST 2020- AUGUST 2021

I worked as an instructor at Rasco Middle School in the special education classroom. I worked with fifth and sixth grade students in a variety of subjects.

Central Elementary School - *Math and Writing Tutor*

JANUARY 2020 - MAY 2020

I tutored fourth grade students in writing and math. I worked with kids in small groups to support the content they were learning in math and writing class.

EDUCATION

Scrimba - *Frontend Developer Career Path (in progress)*

JANUARY 2022 - PRESENT

MIT X PRO - *Professional Certificate in Coding*

OCTOBER 2021 - AUGUST 2022

University of North Texas - *Bachelor's Degree in Media Arts*

AUGUST 2017 - JULY 2019
